Profile Summary

Computer Science student with strong interest in backend development and problem-solving. Skilled in Java, JavaScript, Node.js, Express.js, and MongoDB, with hands-on experience in building REST APIs, authentication systems, and database integrations. Consistent with DSA practice to strengthen algorithmic thinking. Experienced in team projects and event coordination, seeking opportunities to apply technical and analytical skills in real-world backend engineering roles.

Technical Skills

Programming: JavaScript, Java, C, Python
Backend Development: NodeJS, ExpressJS, HonoJS, Cloudflare Workers
GenAI: Langraph, Langchain, Langsmith, OpenAI, Gemini
Frontend Development: ReactJS, Tailwind CSS, Context API
Database & Tools: MongoDB, PostgreSQL, Prisma, Docker, Git, Postman

Projects

Streaker   **Feb-Mar 2025**

- [Github repo](#)   [Live Link](#)   **Tech Stack**: ReactJS, HonoJS, Cloudflare Workers, PostgreSQL, Prisma ORM, Tailwind CSS
- Engineered a full-stack habit tracking application using **React, TypeScript, and HonoJS**.
- Built scalable serverless backend using **Hono.js** on **Cloudflare Workers** and utilized Prisma with **accelerate** extension for database operations.
- Implemented efficient data fetching and caching using **Tanstack React Query** and designed responsive UI with **TailwindCSS**.

Mini-Cursor   **July 2025**

- [Github repo](#)   **Tech Stack**: Python, LangGraph, LangChain
- Developed a terminal-based AI coding assistant for streamlining full-stack project development with AI capabilities to generate **boilerplate code**.
- Integrated **LangGraph** and **LangChain** frameworks for advanced AI workflow orchestration and enabled direct **command execution** from terminal.

Payment App   **June 2024**

- [Github repo](#)   [Live Link](#)   **Tech Stack**: ReactJS, ExpressJS, MongoDB, Tailwind CSS
- Developed a Paytm-like application enabling users to **transfer money** and **check balances** with **database transaction properties** for data integrity.
- Integrated **Zod library** for robust input validation and used **JSON Web Tokens** for secure user authentication.

Blog API - Pencraft   **Nov 2023**

- [Github Repo](#)   [Live API](#)   **Tech Stack**: Hono, Cloudflare Workers, PostgreSQL, Prisma ORM
- Created a dynamic blog platform allowing users to **create and modify** blog posts using **Cloudflare Workers** for efficient backend operations.
- Utilized **Prisma ORM** with **connection pooling** and implemented **input validation** using **Zod** library with **JWT** authentication.

Education

B.Tech in Computer Science & Engineering   **Sep 2022 - June 2026**
Integral University Lucknow, UP   *CGPA: 9.7/10*

Accomplishments & Extracurricular

- **LeetCode Achievements:** Ranked 1421/28725 in contest 397, 1574/24931 in contest 381, 1676/32166 in contest 399
- Selected as the **Campus Ambassador** of HackerEarth at Integral University and **Head of Code Club** at Integral University
