Profile Summary

Full-stack software engineer with experience building and shipping **end-to-end web products**, scalable backend services, and AI-powered SaaS applications. Skilled in **TypeScript, JavaScript, Python, React, Node.js, and PostgreSQL**, with hands-on experience taking features from implementation through deployment and iteration. Interested in building user-focused products, making practical engineering trade-offs, and solving problems across the full product lifecycle.

Technical Skills

Programming: TypeScript, JavaScript, Python, Java
Frontend: ReactJS, Tailwind CSS, Context API
Backend: Node.js, Express.js, HonoJS, REST APIs, Cloudflare Workers
Databases: PostgreSQL, MongoDB, Redis, Prisma
Cloud & Tools: Docker, AWS S3, Git, Postman
AI Engineering: LangChain, OpenAI SDK, RAG, LLMs, Embeddings, pgvector

Experience

Full Stack GenAI Intern

May 2026 – Present

Digital Biz Tech

Tech Stack: Python, TypeScript, React, Node.js, PostgreSQL, LangChain, AWS S3

- Building an end-to-end **SaaS application**, owning features across backend services, AI workflows, databases, and customer-facing interfaces.
- Developing and iterating on product features based on evolving requirements, translating application needs into **REST APIs**, database designs, and practical technical solutions.
- Built an OCR-based document processing pipeline that extracts and transforms information from heterogeneous PDF reports into structured application data.
- Integrated multiple LLM providers, retrieval pipelines, embeddings, and vector search to deliver AI-powered product features.
- Debugged and improved frontend and backend workflows, resolving integration issues and maintaining reliable application behavior across the product lifecycle.

Projects

Streaker - Habit Tracking Platform

Feb-Dec 2025

- [GitHub](#) [Live Link](#) **Tech Stack:** React.js, TypeScript, Hono.js, PostgreSQL, Prisma, Cloudflare Workers, Zod
- Built and deployed a full-stack SaaS application with **25+ REST APIs**, user authentication, activity management, analytics, and configurable goal workflows.
- Designed backend services using **PostgreSQL, Prisma, and Cloudflare Workers**, with optimized database access and pagination for reliable application performance.
- Implemented reusable validation and authentication components using **Zod, JWT, and bcrypt**, enabling consistent and secure request handling across the application.

TinyQueue - Redis-Backed Job Queue

Nov 2025

- [GitHub](#) **Tech Stack:** TypeScript, Express.js, Redis, Bun
- Developed a Redis-backed asynchronous job processing system supporting **FIFO scheduling**, concurrent workers, automatic retries, and exponential backoff.
- Designed reliable job lifecycle management for background workflows and implemented an extensible type-safe handler system for new job types.

PayPulse - Digital Payment Platform

June24-Aug26

- [Github repo](#) [Live Link](#) **Tech Stack:** Node.js, Express.js, MongoDB, JWT, Zod, Bcrypt
- Built PayPulse, a full-stack **peer-to-peer** payments app with React, Node.js, Express, MongoDB, JWT auth, HTTP-only cookies, and Cloudflare Turnstile protection.
- Implemented reliable money movement using MongoDB **transactions**, double-entry ledgering, transfer **idempotency** keys, and a transaction state machine covering **CREATED, PROCESSING, SUCCESS, FAILED, REVERSED, and EXPIRED**.
- Added payment-infrastructure features including signed **webhook** handling, replay protection, webhook retry logic with 5 max attempts, dead-letter queue support, and reconciliation reports for **ledger, account, transaction, and provider-event mismatches**.
- Improved backend operability with named **rate-limit** policies, append-only audit logs, **authenticated** inspection endpoints, and built-in OpenAPI documentation

Education

B.Tech in Computer Science & Engineering

Sep 2022 – Jun 2026

Integral University, Lucknow, UP

CGPA: 9.7/10

Accomplishments

- Solved **600+ Data Structures & Algorithms** problems on LeetCode.
- Head of Code Club** at Integral University and **HackerEarth Campus Ambassador**.
