## Profile Summary

Computer Science graduate passionate about building production-grade **AI applications** and scalable backend systems. Experienced in developing **LLM-powered applications**, **Retrieval-Augmented Generation (RAG)** pipelines, AI agents, REST APIs, and cloud-native software using **Python**, **TypeScript**, **React**, and **Node.js**. Hands-on experience integrating LLM models into enterprise workflows while building reliable, maintainable, and customer-focused full stack software.

## Technical Skills

**Programming:** Python, JavaScript, Java, TypeScript

**Full Stack Development:** NodeJS, ExpressJS, HonoJS, Rest APIs, ReactJs

**AI Engineering:** LangChain, OpenAI SDK, Prompt Engineering, RAG, AI Agents, Embeddings, Vector Databases, Model Orchestration

**Databases:** MongoDB, PostgreSQL, Prisma, Redis, pgvector

**Cloud & Tools:** Docker, Git, Postman, AWS S3, Mistral OCR

## Experience

### Digital Biz Tech

May 2026 – Present

#### Full Stack AI Engineer

*Tech Stack : Langchain, OpenAI SDK, Python, MERN Stack, OCR, AWS S3, FastAPI*

- Developed production-grade AI applications using Python, LangChain, and Node.js, building **Retrieval-Augmented Generation (RAG)** pipelines and AI-powered workflows.
- Designed **AI agents** integrating OpenAI, Google Gemini, and Mistral models with enterprise data sources using vector databases and embeddings.
- Built **OCR-driven** document intelligence pipelines capable of extracting structured information from **heterogeneous** medical reports for downstream AI reasoning.
- Designed **REST APIs**, cloud storage integrations, relational database schemas, and backend services supporting scalable AI applications.

## Projects

### Multi-Tenant AI Invoice Processing Platform (Full Stack AI Application)

Jul-Sep 2026

- [Live Link](#) **Tech Stack:** ReactJs, FastAPI, OpenAI SDK, Mistral OCR, PostgreSQL, Gmail API
- Built a **multi-tenant** invoice management platform using React, TypeScript, FastAPI, PostgreSQL/Supabase, with organization-based user provisioning and role-based access control.
- Implemented invoice ingestion and review **workflows**, including upload, OCR/AI extraction, verification screens, audit ledger views, custom fields, projects, vendors, and status management.
- Developed organization **onboarding** features including admin-managed user **invites**, Supabase Auth integration, invite validation, password setup flow, and tenant-safe provisioning.
- Added operational features for production readiness, including **audit logging**, **rate limiting**, Gmail/Google Drive integration flows, error handling, and frontend/backend build validation.

### Medical AI Report Platform (Full Stack AI Application)

May-Jul 2026

- [Live Link](#) **Tech Stack:** Python, LangChain, OpenAI, Mistral OCR, PostgreSQL, pgvector
- Built end-to-end AI system for analyzing pathology reports using **OCR** and Retrieval-Augmented Generation.
- Developed conversational **AI assistant** capable of answering report-specific medical questions using contextual retrieval.
- Designed secure document ingestion pipeline with **embeddings**, vector search, and structured report generation.
- Integrated **multiple** LLM providers and optimized prompt workflows for accurate information retrieval.

### TinyQueue - Redis-Backed Job Queue (Backend Application)

November 2025

- [GitHub](#) **Tech Stack:** TypeScript, Express.js, Redis, Bun
- Developed a Redis-backed distributed job queue supporting **FIFO** scheduling, concurrent worker execution, automatic **retries**, and **exponential** backoff.
- Designed fault-tolerant job lifecycle management using Redis data structures for reliable asynchronous processing.
- Implemented extensible worker architecture enabling scalable **background** task execution with type-safe job registration.

## Education

### B.Tech in Computer Science & Engineering

Sep 2022 - June 2026

Integral University Lucknow, UP

**CGPA: 9.6/10**

- Releted CourseWork** - Data Structure & ALgorithms, Database Management System (DBMS), OOPS, Computer Networks, Operating System, Distributed Systems Fundamentals

## Accomplishments & Extracurricular

- LeetCode Achievements:** Solved 700+ Problems & Ranked 1421/28725 in contest 397, 1574/24931 in contest 381, 1676/32166 in contest 399
- Selected as **Campus Ambassador** of HackerEarth at Integral University and **Head of Code Club** at Integral University
